

**Tip No 8:** Here is a link to a web site called [ROAN](#). This site is a wealth of information for Rotax Owners as it has all the recourses needed to properly operate and maintain your Rotax Engine.

*Especially helpful are the Maintenance Forms which take care of the record keeping with regard to what is needed at each maintenance interval and provide a handy Check List for the maintainer to ensure all required items are completed.*

*The completed forms can then be kept with your Engine Log Book as proof of the service and as a positive record for a potential future purchaser.*

You can find all previous Savannah Tips and products on my [Web Site here](#).
